

**SOME TIPS
FOR CLEANER
NEIGHBORHOODS AND STREETS:**

Bag all leaves, grass & pine needles.

Crush boxes so they fit loosely in recycling containers. (That water heater behind the containers is hidden & difficult to reach.)

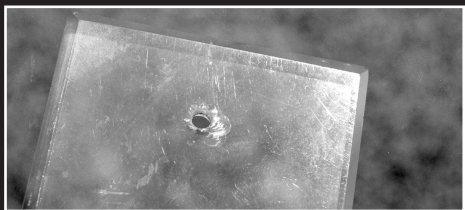

Separate trash & yard waste for composting.

Avoid putting trash on medians.

Setout materials on time or take it to the Bethel Landfill.

Due to the dangers posed by shards on the street, the city cannot take glass doors or mirrors. Please take these items to the landfill.

CURB APPEAL

Curbside collection is successful only in partnership with customers. When items are set out correctly, one driver in an automated truck can quickly and neatly remove material and serve about 1,000 homes a day.

“Bulk trash” in the city program is any item too big to fit in the household refuse container-sofas, large appliances, mattresses.

For “extra trash”:

- Get a neighbor's permission to use his or her container.
- Take it to the Bethel Landfill. (Hampton residents with proof of address can take normal household debris to the landfill-free of charge.)
- Take recyclables during operating hours to Tidewater Fibre at 5602 Chesnut Avenue in Newport News (near Hampton border).
- Deliver yard waste to the city's processing site inside Bethel Landfill 100 N. Park Lane, off Big Bethel Road.
- Hold the extra material back until the next week's collection.
- Pay a private hauler to take it away.
